

CONTENTS.

CHAPTER I.	PAGE
THE BASIS OF LITHOGRAPHY	1
Planography—A Chemical Process—Some Chemical Terms—Action of Oleic and Arabic Acids—An Outline of the Lithographic Process.	
CHAPTER II .	
LITHOGRAPHIC STONES	5
The Solnhofen Quarries—The Origin of the Solnhofen Stone—The Archaeopteryx—Qualities of Stones—Backing Thin Stones—Preparation of Stones—Importance of Uniform Thickness—Testing Stones—Stone-polishing by Chemical Means—Graining Stones—The "Hausa" Automatic Stone-grinding Machine—Thickness and Weight of Standard Sizes of Stones.	
CHAPTER III.	
ALUMINIUM AND ZINC PLATES	17
Occurrence and Properties of Aluminium—Graining of Aluminium Plates—Plate-graining Machine—Finishing Operations—Removal of Work from Plates—Occurrence and Properties of Zinc—Preparation of Zinc for Lithography—Graining Metal Plates by Hand—The Relative Values of the Different Print-	
CHAPTER IV.	
CHEMICALS AND OTHER MATERIALS USED IN LITHOGRAPHY	22
Chemical notation.	
LIST OF PLANOGRAPHIC MATERIALS—Acetic Acid—Alum—Ammonium Nitrate—Ammonium Phosphate—Asphalt—Beeswax—Benzoline—Bichromate of Potash—Carbolic Acid—Castor Oil—Caustic Potash—Caustic Soda—Chromic Acid—Citric Acid—Crayons—Cuttle-fish Bone—Dabbers and Daubers—Damping Cloths—Dextrine—Flake White—French Chalk—Gelatine—Glass Powder—Glycerine—Gold Size—Gum Arabic—Gum Asphaltum—Gum Elemi—Gum Gamboge—Hydrochloric Acid—Indiarubber—Lampblack—Lavender Oil—Linseed Oil—Litharge—Magnesia—Naphtha—Nitric Acid—Offset Powder	

—Oleic Acid—Oxalic Acid—Palm Oil—Paraffin Oil—Paraffin Wax—Peasemeal—Phosphoric Acid—Pitch—Plaster of Paris—Potash, Caustic—Pumice Stone—Resin—Rubber—Sand—Shellac—Soap—Soda, Caustic—Sodium Phosphate—Sponges—Starch—Stearine—Suet—Syrup—Tallow—Tam o' Shanter Stone—Terebene—Turps—Varnish (Litho)—Vaseline—Water of Ayr Stone—Whitening.

CHAPTER V

DRAWING, PROVING, AND HAND-PRESS WORK

Methods of Lithographic Drawing—Number of Printings—The Work of the Prover—Making a Key—Guide Lines and Register Marks—Offsets or Faints—Reversing the Key—Offsets or Faints for Offset Machine Work—Hand Stippling—Shading Mediums—Finishing Stipple Work—Crayon Work—Treating Crayon Work on Stone—Treating Crayon Work on Metal Plates—Aerograph or Air-brush Work (The New Lithography)—The Air-brush—The Process—Preparing the Stone for the Work—Gumming-out or Stopping-out—Preparing the Stone for Proving, Printing, or for Transfers—Splash Work—Photo-chromolithography—Proving Chromo-lithographic Work—How to Ensure Perfect Register—Prevention of Offsetting.

HAND-PRESS PRINTING—Business Cards, Invoices, etc.—India Paper Prints.

CHAPTER VI.

TRANSFER PAPERS AND INKS

Kinds of Transfers—Varieties of Transfer Papers—Stone-to-stone and Stone-to-plate Transfer Papers—Scottish Transfer Paper—Berlin Transfer Paper—French Transfer Paper—Semi-moist and Ever-damp Transfer Papers—Copperplate Transfer Paper—Letterpress-to-stone (or Metal Plate) Transfer Paper—Photo-litho Transfer Paper—Litho-writing Transfer Paper—Grained Transfer Paper—Materials for Coating Transfer Papers—Recipes for Transfer Paper Coatings—Materials Used in Making Transfer Inks—Recipes for Transfer Inks.

CHAPTER VII.

TRANSFERS

Transfer Impressions—Copperplate Press and Accessories—Copper and Steel Plate Transfers—Testing for Pressure—Inking over and Pulling the Transfer—Quality of Paper—Offsetting Copperplate Transfers—Effect of Unequal Damping—A Quicker Process for Copper and Steel Plate Transfers—Advantages of Stone Engraving—Decline of Stone Engraving in Britain—American Commercial Stone Work—Preparing a Stone for Engraving on—Inking in the Engraving—Pulling the Transfer—Photo-litho Transfers.

CONTENTS.

xi

CHAPTER VIII.

	PAGE
HATCHING OR IMPOSITION OF THE TRANSFERS	66
Introductory—Gripper Allowance—Testing the Lay-out Sheet— Imposition of the Pages—The Margins—Sticking down the Transfers—The Key Sheet—Treatment of Small Patches.	

CHAPTER IX.

HAND AND POWER TRANSFERRING AND PRINTING PRESSES	73
Mechanism of the Transferring Press—The Broadway Press—The Top-lever Press—Tympanis—Scrapers—Need of Uniform Pres- sure—Adapting the Scraper to the Scraper-box—Bed of the Press and Packing—Cleanliness Essential.	

CHAPTER X.

TRANSFERRING	79
A Fascinating Art—Importance of Cleanliness—General Considera- tions in Transferring—The Transferring Process in Outline— Treatment of Stones with Alum Solution—Effect of Alum Treatment—Warm Stones—Other Methods of Preparing a Stone—Testing the Scraper—Adjusting the Pressure—Trans- ferring the Work to the Printing Stone—Preparing the Stone for Desensitizing—Acid Resists—The Inking-in Process—A Better Method of Inking-in—The First Etch—The Second Etch—Defects of the Above Method—The Great Principle of Transferring—Rubbing and Rolling-up—Summary Detailed Practical Description—The First Inking—Applying the Acid Resist—Picker and Polishing Stone—The First Etch— Preparation for the Second Etch—The Second Etch—Etching for High Relief—Transferring Autographs to Stone—Trans- ferring to Metal Plates—Zinc Transfers—Aluminium Transfers —Cleaning-up Metal Plates.	

CHAPTER XI.

A SIMPLE, LABOUR-SAVING TRANSFERRING PROCESS	94
Established Practice—Great Care and Skill Required—The Troubles Obviated by a New Process—The Arobene Treatment Described —The Two Methods Compared—Advantages of Arobene— Treatment at End of Day—Preparation for Machine—Arobene for Proofs.	

CHAPTER XII.

REDUCING AND ENLARGING BY MACHINE PROCESS	97
Usefulness of Reducing and Enlarging Machines—The Fougadoire Machine—Coating for Rubber Sheet—Application to New Work—Proper Condition of Coating—Taking the Impression— Burnishing—The Reducing or Enlarging Process—Application to Chromo Work.	

CHAPTER XIII.

TRANSPOSING AND REVERSING	PAGE 102
Meaning of Transposition—The Relief or Polishing Method—The Gum Method—The Transfer Method—Principle of the Transfer Method—Reversing Transfers—The “Reverso” Transfer Reversing and Offset Proving Press—The “Reverso” for Proving Offset Work—Other Uses of the “Reverso”	

CHAPTER XIV.

PAPER	109
Paper-making Material.—Rags—Esparto—Wood Pulp—Other Materials—The Process of Paper-making—Preparation of the Raw Material—Making of the Pulp or Half-stuff—Bleaching the Pulp—Beating the Pulp—Loading, Sizing, and Colouring—Hand-made Papers—Machine-made Paper—Finishing Operations—Art Papers—Mixing of Pulps—Physical Qualities of Paper—Paper and Moisture—Lithographic Requirements in Paper—Standard Sizes of Writing and Printing Papers—Standard Sizes of Cards.	

CHAPTER XV.

THE THEORY OF COLOUR	125
Light and Colour—The Nature of White Light—The Spectrum of White Light—Coloured Bodies—Luminosity of Colours—Primary and Derived Colours—The Mixture of Coloured Lights—Complementary Colours—The True Primary Colours—Contrast of Colours—Colour Harmonies.	

CHAPTER XVI.

PRINTING INKS	131
Constituents of Printing Inks—Linseed Oil—Boiling the Oil—Black Pigments—White Pigments—Blue Pigments—Red Pigments—Yellow Pigments—Green Pigments—Brown Pigments—Purple, Violet, and Mauve Pigments—Permanence of Pigments—Transparency of Pigments—Tints, Mediums, and Pomades—Drying of Inks—The Mixing of Inks—Varnishable and Non-varnishable Inks—Preparation of Inks by the Lithographer—Consistency of Inks—Driers in Chromo Work—Printing Tints.	

CHAPTER XVII.

LITHOGRAPHIC PRINTING MACHINES. DIRECT FLAT-BED MACHINES.	147
Introductory—Types of Lithographic Printing Machines—The Direct Printing Flat-Bed Machine—The Frame—The Carriage—The Impression Cylinder—Driving the Carriage—Driving the Cylinder—The Cylinder-starting Arrangement—A Double Inking Mechanism—The Cylinder-locking Arrangement—The Furnival Cylinder Brake—Other Cylinder Brakes—Air-cushioning Cylinders—The Inking Mechanism—The Damping Mechanism or Water Motion—The Feeding Mechanism—The Delivery Mechanism—The Machine Brake.	

CHAPTER XVII.		PAGE
MACHINE AND HAND-PRESS ROLLERS		168
The Different Kinds of Rollers—The Forme-inking Rollers—Nap Forme-inking Rollers—Glazed Forme-inking Rollers—Rubber- covered Forme-inking Rollers—The Ink-distributing Rollers— The Rider Rollers—The Vibrating Ink Ductor Roller—The Forme-damping Rollers—The Vibrating Damping Ductor Roller—The Water-fountain Roller—Hand Rollers.		

CHAPTER XIX.

ROTARY AND OFFSET MACHINES		169
Introductory.		
THE DIRECT ROTARY MACHINE—The Frame—The Plate Cylinder —The Impression Cylinder—The Inking Mechanism—The Damping Mechanism—Feeding and Delivery Mechanism— The Slow Turning Motion.		
THE FLAT-BED OFFSET MACHINE—Introductory—The Transfer or Offset Cylinder—The Impression Cylinder—Feeding and Deliv- ery Mechanism—Prevention of Doubling—Conversion to Direct Machine.		
THE ROTARY OFFSET MACHINE—General—The Transfer or Offset Cylinder—The Impression Cylinder—The Feeding Mechanism —The Delivery Mechanism—Device for Ensuring Register— Gear Marks—Power for Lithographic Machines		
AUTOMATIC ACCESSORIES OF LITHOGRAPHIC MACHINES—Automatic Feeders—The Harris Feeder—The "Slogger" Feeder—The "Dexter" Feeder—The Jogger—The Automatic Counter.		

CHAPTER XX.

EXAMPLES OF PRINTING MACHINES		188
Introductory—The "Wogdon" Improved Litho Press—Furnival & Co.'s Improved "Express" Direct Flat-bed Machine—The Scott Stop-cylinder Flat-bed Machine.		
Furnival & Co.'s Flat-bed Offset Machine Attachment—The "Re- liable" Flat-bed Offset Machine.		
The "Reliable" Direct Rotary Machine—The L. & M. Direct Printing Rotary Machine—Furnival & Co.'s Direct Printing Rotary Machine—The Scott Direct Rotary Machine—R. Hoe & Co.'s Direct Rotary Press.		
The "Baby" Rotary Offset Machine—The Waste Rotary Offset Machine—The L. & M. Rotary Offset Machine—The Furnival Rotary Offset Press—The Harris Automatic Rotary Offset Press—The Scott Six-roller Offset Press, with "Dexter" Feeder.		
George Mann & Co.'s Two-colour and Perfecting Rotary Offset Machine—R. Hoe & Co.'s Two-colour Rotary Press—R. Hoe & Co.'s New-pattern Two-colour Rotary Press—R. Hoe & Co.'s Three-colour Rotary Press.		

CHAPTER XXI.

MACHINE MANAGEMENT	PAGE
Method, Order, Cleanliness—Requirements of the Machineman—Acquaintance with the Machine—Attention to the Cylinder—The Cylinder Brush and Grit-guard—The Cylinder and Fly-wheel Brakes—The Flyer Drum—The Gearing—The Stone or Bedplate Carriage—The Under-parts—The Side Rails—The Air-cushioning Cylinders—The Ink Duct—The Water Duct or Fountain—The Damping Slab—The Machine Belts—The Cylinder Coverings.	218

CHAPTER XXII.

MACHINE PRINTING FROM STONE	225
Setting the Stone—Mixing the Ink—Ink for Bright Enamel Papers—Washing-out the Work—Taking the Impression—A Register-finder—Three Great Principles in Printing—Overlaying the Cylinders—Gaining Experience—Doctoring Thickened Work—Doctoring Weakened Work—Paper-creasing at the Machine.	

CHAPTER XXIII.

PRINTING CHROMO OR COLOUR WORK	234
Interesting but Anxious Work—Precautions against Bad Register—The Keystone—Bronze and Metal Leaf—The Safety Vacuum Bronzing Machine—Hints on Bronzing—The Rotation of the Colours—Print the Outline Forms Early—Double Printing and Double Rolling—The Cause of Setting-off—Prevention of Setting-off—Register—Some Causes of Inaccurate Register—Improvement of Register—Unequal Damp and Pressure—How to Remedy Expansion of the Paper—Altering a Section.	

CHAPTER XXIV.

MACHINE PRINTING FROM METAL PLATES	246
FLAT-BED PRINTING—The Iron Bedplate Supports—Printing from Metal Plates—Effect of Gum on Metal Plates—An Experiment.	
ROTARY PRINTING—The Principles—Setting the Pressure—Register on Rotary Machines—The Automatic Damping Apparatus—The Forms-inking Rollers—Special Precautions on Offset Machines—Cylinders True with each other—The Rubber Blanket—Inks for Offset Machines.	

CHAPTER XXV.

SPECIAL FINISHING AND OTHER PROCESSES	252
Varnishing Lithographed Work—Gelatinizing Lithographed Work—Finishing Chromo Work—Roughing Printed Work—Graining Printed Work—Embossing—Spangle and Kindred Work—Graduated Tint Printing—Rainbow Printing—Printing Transparencies.	

CONTENTS.

XV

CHAPTER XXVI.

	PAGE
DIRECT PHOTO-LITHOGRAPHY IN LINE AND HALF-TONE	258
Direct Photo-lithography—The Line Process—The Half-tone Process—Half-tone Lithography—Ordinary Three-colour Work.	

CHAPTER XXVII.

LITHO PRINTING ON FABRICS AND TINPLATE: DECALCOMANIE TRANSFERS	261
The Older Process for Silk and Calico—The New Method—The Older Process of Tinplate Printing—Direct Tinplate Printing—Decalcomanie Transfer Printing.	

CHAPTER XXVIII.

ECHELON TYPE PRINTING	268
Nature of the Process—The Negative—Preparing the Printing Plate—Printing the Image—Washing and Preparing the Plate—Printing.	

CHAPTER XXIX.

COPPERPLATE OR INTAGLIO PRINTING	271
Intaglio Printing—Intaglio Processes—Line Engraving—Etching—Dry-point Engraving—Mezzotint Engraving—Aquatint Engraving—The Crayon Method—Stippling—Colour Printing—Photogravure—Commercial Photogravure.	

CHAPTER XXX.

ESTIMATING AND COSTING	279
The Relation of Estimating to Costing—A Sample Estimate and Cost Sheet—The Elements in Price—Cost of Production—Two Forms of Oncost—Departmental Oncost—Office Oncost.	

CHAPTER XXXI.

THE TRAINING OF APPRENTICES	287
Explanation—An Expensive Luxury—Responsibility of Employers—An Apprentice Guardian Committee—The Term of Apprenticeship—Suitability of Lads—An All-round Training Necessary—A Suggested Course—Technical Education.	

COMBINED INDEX AND GLOSSARY	295
