The following pages have been drawn up with a view of furnishing a continuation to Dr. Russell's History of Modern Europe,—a work of great merit, and of deserved popularity. Although the space of time that has elapsed since the termination of Dr. Russell's labours is comparatively short, being rather less than seventy years, yet such are the stupendous events which are crowded into it, and such their extraordinary importance, as to render a succinct and luminous exhibition of them a matter of general interest. Nor is it possible that they should ever cease to interest the inhabitants of Europe: posterity will find in a faithful record of them, not merely matter of surprise and astonishment, but materials of instruction to the Statesman, the Philosopher, and the Philanthropist. In detailing them to the public, the author can lay claim to no praise but that of fidelity in the narration. "Sacrifice only to truth" has been his constant motto, and the reader may assure himself that, while perusing these pages, he is not amusing himself with the "Romance of History.

Hoxton, June 11th 1828."
