PART I.

GENERAL INTRODUCTION Page 5

Of the attack from the windward—Demonstrations 23

SECTION I.

Method of attack in the case of single ships 23

SECTION II.

Comparison of the effect of shot directed against the rigging of a ship, with its effects when directed against the hull

SECTION III.

Of bringing great fleets to action.

A preliminary case, shewing that any one ship, in her station in the line of battle, must be at a considerable distance to admit of being exposed to the fire of three or more ships bearing upon her at one and the same time, expanded, as they must be, in the line of the enemy.
CONTENTS.

SECTION IV.

Of the principles necessary to be known for enabling us to judge of the
different modes of bringing great fleets to action — — Page 33
A farther illustration — — — — — — — — — — — — 34

EXAMPLES.

INTRODUCTION

Engagements in former wars—Engagements of the late war,
twelve in number — — — — — — — — — — — — 41

SECTION I.

Of engagements, the British fleet being to windward 43

I. Admiral BYNG's engagement off Minorca, May 20. 1756 44
II. Admiral BYRON's engagement off Grenada, July 6. 1779 50
III. Admiral ARBUTHNOT's engagement off the mouth of the Chesapeake,
March 16. 1781 65
IV. Admiral GRAVES's engagement off the mouth of the Chesapeake, Sept-
tember 5. 1781 71
V. Sir GEORGE BRIDGES RODNEY'S engagement off the west end of
Martinico, April 17. 1780 77

SECTION II.

Of engagements where the French, by keeping their fleets
to windward, have clearly shown their dislike, as well of
making the attack themselves, as of suffering the Brit-
ish fleet to approach them while in this windward situa-

INTRODUCTION.

The Attack of Fleets from the Leeward—Demonstrations.

SECTION I.

Of Fleet working to Windward.

SECTION II.

Simple Attack.

Recapitulation of a few of the Remarks on the Battle of Ushant, on the 27th Jan., 1793.
CONTENTS.

SECTION III.

CROSS ATTACK.

Mode of Attack from the Leeward illustrated 179

Examples of cutting an enemy's line of battle by the headmost ships of the squadron in port from the leeward 180

When the leading ships shall have fetched the rear of the enemy's line, suppose the three headmost ships 180

When the leading ships shall have fetched the centre of the enemy's line of battle 182

When the leading ships shall have fetched the fourth or fifth ship, and shall cut the van off from the centre and rear of the enemy's line 183

Observations on the third longgoing case of the attack when made by the headmost ships of a squadron 184

Of cutting the enemy's line with the fifth or sixth ship, or any one next within of these on the van of the line, but let it be the fifth ship for example, which ship, like the former, may be divided into three several parts 185

The attack on the rear of the enemy's line with the fifth ship is on the van 188

Of the cutting the enemy's line at the centre with the fifth ship 187

The attack on the van of the enemy's line with the fifth ship 189

The attack with the centre 188

Demolition 194

SECTION IV.

The perpendicular Attack, or the Attack at right angles 195
