RHYMING DICTIONARY.
AN

IDEA OF THE ARRANGEMENT OF WORDS IN THIS DICTIONARY.

As in other Dictionaries words follow each other in an alphabetical order according to the letters they begin with, in this they follow each other according to the letters they end with. All words therefore that end with a are placed first in this Dictionary, as all those that begin with a are placed first in other Dictionaries; those that end with b are placed next, and so of the rest. The directing letters at the top of each page, are likewise in the same order; that is, they are the last letters of words instead of the first.

DIRECTIONS FOR FINDING WORDS.

In looking for a word, the last letter is to be sought first, the last but one next, and so on from the last to the first letters of a word in an order exactly contrary to that of other Dictionaries. Thus, if I want to find the word Idea, I must first look for a, among those words which end with a; these I find in the page opposite to this. The next letter I want is e, I therefore look among those words that end with a, for a word whose last letter but one is e, and find it in the word Panacea, the twenty-fourth word from the top; the next letter d, I look for among those words that end with ea, and find it in the third word after Panacea, which is the word I sought. So that for the last letter of a word, I look among those words ending with the same letter; for the last letter but one of a word, I look among the last letters but one of these words, and so of the rest.

It must be particularly noted, that the directing letters on the top of each page, are to be looked for in the same order, that is, from the right hand to the left.

The best way to avoid confusion, will be to look for the letters one by one, and to begin with the first word of every class, and so proceed downwards till the word is found. Thus, if I want to find the word Alphabet, I keep the last letter t in my mind, and turn to that part of the Dictionary where the words ending with t are classed, which is near the end. The first word of this class I find to be at; the next letter I want is e; I therefore run my eye down the last letter but one of this class till I come to bet, the next letter I want is a, which leads me to fix my eye upon the fourth letter from the last, which brings me to abet, and so of the rest.

As this arrangement is perfectly simple, two or three trials will render it as intelligible as the common order, especially if the word we look for be first written down, and carried along with the eye in its search.
