Aristobulus, a Neo-Platonist teacher, admitted the facts of the Old Testa- ment, 508

Aristotle, his sentence on poetry, 32; his interpretation of "Wisdom" (σοφία), 42; of "Dialectic," 46, n.; his "Metaphysics," 47; his description of the "Philosophia Prima," 48, n.; his character as an Historian of Philosophical systems, 121, 189; his treatment of his predecessors criticised by Bacon, 121, n.; is studied at the period of the revival of letters, 130, 151; his judgment of Anaxagoras, 187; his criticism of the Pythagorean "Antichthon," 217, n.; his testimony as to the doctrines of Xenophanes of Colophon, 221, n.; his relation to modern "Nominalism," 362, and note; he traces a connexion between the "Numbers" of Pythagoras and the "Ideas" of Plato, 367, 368; which latter he invariably represents as true, and real, and distinct existences, 372; he pronounces exemplar ideas to be mere "poetical metaphors," 388; accuses Plato of neglecting efficient and final causes, 399; criticised by Bacon, ib.; contrasted with Plato in respect of their physical theories, 399; he denied the creation of "Time," 408, n.; his ἐνθῆ corresponds to Plato's ἀναστάς, 410, n.; his astronomical dogmas, 423; his small influence on the age immediately preceding the Christian era, 501, and note; dictum of, falsely explained, 468, n.; his TREATISE Περὶ φυσικής, 573—581; his style, 529, 551; analysis of his treatise, 545; his materialism, 547, 560; his criticisms on his prede- cessors, 527—533; power of classi- fication, 529, 535; asserts the unity of Soul, 533; his "forms," 538; compared with those of Kant, 547; his view of Body, 538; definitions of the Soul, 539, 541; value of his physiology, 541; imperfection of, 543; characteristics of "vegetable life, 542; his analysis of sensation, 543—548; Sound, Hearing, Smell, Taste, Touch, 545, 546; his "common sense," 549; Fancy, 550; Memory, 550, n.; theory of the Intellect distinguished into Passive and Ac- tive, 551, 553, n.; his view of the motive faculty of the soul, 555; of the motion of animals, 557; his opinions on the immortality of the soul contrasted with those of Plato, 559, and with the Christian revela- tion, 560

Aristoxenus, his doctrine "The soul is a Harmony" criticised by Ari- stotle, 530

Arithmetic, its use, in Plato's view, as a guide to "Dialectic," 341

Arrian, his discourses of Epictetus, 262

Art, taste for, favourable to speculative habits, 177; the outward expression of conceptions of order and harmony, 177; genius of the Greeks for Art, 227

Ascenticism, 277; it fosters pride, 282; practised by the Neo-Platonists, 518

Ast, denies the genuineness of the "Platonic Epistles," 301, n.; rejects as spurious twenty-one of Plato's Dialogues, 321, n.

Astronomy, study of, has been found historically to precede that of the other physical sciences, 7; Indian, 156; notions of the Pythagoreans, 317; scientific study of, a prelude to "Dialectic," 343; system presented in the Timeus, 421

Atheism, of Leucippus, 206; ten- dency of materialism to, 288

ἄθεον, Theodorus, one of the Cyre- naics, 289

Athenæus, 126; his list of some of the most distinguished of Plato's pupils, 303

Atoms, Buddhist theory of, 167; doctrine of, attributed by Plutarch to Empedocles, a fact which Aristotle seems to deny, 200, n.; theories of Democritus and Leucippus, 205, 206

Atomistic doctrine "points to the corpuscular theories of modern times" (Whewell), 205, n.

Attention, of mind, indispensable element of scientific genius. Example of Newton, 108

Augustine, believer in the objective reality of knowledge, 28; influenced by Platonism, 293; believed in the immediate inspiration of Plato,
INDEX.

316; passage from his De Doctr.
Christianæ, claiming for Christianity
the truths discovered by heathen
philosophers, 317; his view of the
Platonic theory of Love, 477

Authority, excessive deference to,
more prevalent in the field of human
than of natural philosophy, 113

Averroes, the Arabian, maintained
materialism on the part of Aristotle, 560

B.

Bacon, Lord, his opinion of the value
of the "Philosophia Prima," 47, 48;
his justification of his aphoristic
method, 54; he considered his inductive
method applicable to mental no
less than to physical phenomena,
78—80. M. Cousin's critique of
him, in comparison with Descartes,
examined, 79—82; Dugald Stew-
art's opinion of his genius for the
philosophy of mind, 81, n.; his in-
fluence on psychology, 82; speculative
side of his philosophy imper-
fected, 82; his views of the relation
of Religion to Philosophy, 83, n.; not
responsible for the errors of his fol-
lowers, 83; his division of the fac-
culties into Memory, Imagination,
Reason, 106; his censure of Aris-
totle's treatment of his predeces-
sors, 121, n.; his idea of a History
of Philosophy, 131: his term "Lu-
men Siccum," possibly derived from
a false reading of Heraclitus, 109, n.;
his "globus intellectualis" explained,
200, n.; Globes—of matter and
of form, 200, n.; compared with
Socrates, 233—235; his belief in
magic and witchcraft, 239; his cri-
ticism on Aristotle's "final causes;
399

Bailly, his opinion of the antiquity of
the Indian Astronomy, 156

Barrow, influenced by Descartes, 82;
one of the "Cambridge Platonists,"
203

Baur, his essay "Das Christliche des
Platonismus, oder Socrates und
Christus," 298

Bayle, 134

Beautiful, the, 336; unity of with the
Just and the Good, 469; treated of
in the Phædrus and the Symposium,
479, 480

Being, one of the three principles
pre-existent to the formation of the
Universe, according to the
Timeus, 414. (See Place and Pro-
duction)

Bellarmine, Cardinal, dissuades Cle-
ment VIII. from sanctioning Plan-
tonism, 299

Bentley, believed in the authenticity
of the Platonic Epistles, 302, n.

Berkeley, 305

Bernays, his Hærclitca, &c., 198, n.

Body, its connexion with the soul,
according to Plato, 452; his hatred
of, 486; contempt of by the New
Platonists contrasted with the Chris-
tian reverence, 519; Aristotle's view
of, 538

Bopp, 158

Bouterwek, 33, and note

Brahma-Sutra, the, 164

Brandis, his Commentationes Eleatice,
219

Brown, Dr., his relation to Hume,
28; denied the possibility of a
priori deduction as applied to the
Deity, 28; his controversy with
Reid, 353, n.; 496, n.; question of
consciousness distinct from sensa-
tion, 548

Brucker, his history of Philosophy,
134; considered philosophy the
science of happiness, 139; his ac-
count of the philosophy of Empe-
docles not to be relied on, 202, n.;
his section on Plato the worst part
of his great work, 465

Brutes, Plato's view of them in rela-
tion to man, 445

Buddhists, 161, 165—167; Buddhism
known at Alexandria, 155

Buffon, 139

Burnet, his notice of the "Cambridge
Platonists," 203, n.

Butler, Bishop, his Analogy, 397; his
account of the course of temptation
compared with the myth in the
Phædrus, 438; his argument for a
future life, 454

C.

Callippus, his astronomical notions,
423

Cambridge Platonists, 293, n.

CampANELLA, 222

Campbell, Thomas, his lines on the
rainbow, 99

Capila, the founder of the Sâṅkhya,
161, 163, 164

Capulis, the, 165

Carneades, the most celebrated teacher
in the Academy, 494—497; his po-

tition similar to that of Kant, 499,
497

Casanbon, Isaac, 298

Causation, 10, 11, 65
INDEX.

Cebes, disciple of Socrates. His III., or Tabula, 246, 247, and n.

Cenobites, 218

Century, 17th, Philosophy in the, 15; religious wars of, 103

Chabrias, a pupil of Plato, 303, n.

Chaos, expresses probably the ἀτείχον of Anaximander, 203

Chemistry, influence of the study of, on mental science, 105, and note, 205, n.

Chladni, 68

Christianity, its bearing on the study of the Philosophy of Mind, 89—91; connexion of, with Platonism, 295—399, 316—318; compared with Platonism, 325, 485, 486; doctrine of the resurrection of the Body, 486, 519, 520, 561

Chrysippus, 256, 257, 263

Cicero, his definition of philosophy, how to be understood, 46, and note; his character as an Historian of Philosophy, 122, n.; his notice of the Socratic style, 245; his complaint of the insincerity of the Cynics, 282; his eulogy of Plato's style, 305, 306; his description of Phidias's Ideal, 394; his testimony as to the date of the Phaedrus, 437; n.; as to the Academic system, 490; his account of the doctrines of Antiochus, 498

Clarke, 185; his a priori arguments for the existence of God similar to those of the Eleatics, 224

Classics, rediscovery of the, 130

Cleanthes, 263

 Clemens Alexandrinus, wrote on Buddhism, 155

Colebrooke, 161; he assigns the Vedas to 1400 B.C., 159

Commentators on Aristotle, 501

Conceptualism, theory of, stated and rejected in the Parmenides, 362

Condillac, a development of Locke, 149

Condorcet, his Esquisse, 136

Consciousness, 140; question of, distinct from mere sensation, raised and discussed by Aristotle and Brown, 549

Copernicus, his acknowledgment of his debt to Cicero's notice of Hicetas, 472

Cousin, Victor, his critique of Bacon, examined, 70—82; his character as an Historian of Philosophy, 136, 148; his essays on Xenophanes and Zeno, 219

Cowell, Professor, cited, 174

Crantor, an Academic teacher, 490

Crates, an Academic teacher, ib.

Cratylus, Plato's teacher in the doc-

trines of the Heracliteans, 307, 355

Cudworth, his Intellectual System, 133

Cynics, the, maintained that Virtue is ἀθαλός, 237, n.; their doctrines distortions of the Socratic teaching, 278; ethical rather than speculative, 279; discussed, 275—285

Cyrenaics, the, compared and contrasted with the Cynics, 275—280; their philosophy discussed, 286—291

D.

Demon, so-called, of Socrates, 238, and note

D'Alembert, his character as an Historian of Philosophy, 136

Damastes, his work Περὶ των πρώτων καὶ υπόφιλων, 120

Death, Plato's view of, 343, 452

Definitions, of Philosophy, 138, 139

Dégironde, his Histoire Comparée, 129, 136

De Launoy, 133

Democracy, leads to examination of principles, 102, 103

Democritus, of Abdera, 205—207, and notes; criticised by Aristotle, 518

Descartes, 27, 36, 47, n.; his Meditation de la Prima Philosophia, 48; his rules in the Tract. de Methodo, 80; Dugald Stewart's opinion of him compared with M. Cousin's, 81, n.; his influence on the Cambridge Platonists, 82, n.; influenced by Plato, 293; his doctrine of the nature of matter, 405; he classed the brute creation with the purely mechanical, 445

Design, popular argument of, incomplete, 66

De-polishism, its effect on philosophy, 152

Destutt-Tracey, 50

Diagoras, 231, and note.

Diagoras, the, of Plato, collected by Aristotle, 311

Dialectic, Aristotle's description of, 46, and note; its invention attributed to Zeno by Diogenes Laertius, 223; in Plato's treatment, the science which treats of eternal existences, 333; the "air" to which other sciences are the "preludes," 342; examination of, 344—350; answers to Aristotle's Metaphysics, 344; the term derived from the Socratic mode of discussion, 344; the science which apprehends absolute certainty, 348
INDEX.

Dialogue, invention of the, attributed to Zeno by Diogenes Laertius, 305; Plato’s treatment of it compared with that of Cicero and others, 305; tendency to encourage scepticism, 492

Dialogues, of Plato: disputed genuineness of some of them, 321, n.; order of composition, 322; classification of by Thrasyllus in tetralogies, 323; Schleiermacher’s principle of arrangement, 323

Diderot, 265

Diodorus Cronus, of the Megaric School, 258—266

Diogenes Apolloniates, 197, and note.

Diogenes, the Cynic, 231; styled Ἰωάννης τοῦ μαντιδοῦ, 279; his character, 231

Diogenes Laertius, his character as an Historian of Philosophy, 175, and note.

Dominicans, their name (Dominicani) compared with that of the Cynics, 281, n.

Dorner, his Christologie, 296, n.

Duhemel, his De Consensus Veteris et Nova Philosophiae, 133

E.

Earth, see ἀρχή: rotation of, held by Plato, according to Aristotle’s erroneous statement, 421

Eclecticism, of the later Greek Schools, 408, 499

Education, feebleness of all human, in Plato’s view, 303, 304

Egoism, 50, 51, and note.

Egypt, influence of on Greek philosophy, 178; did Geometry come from? 178, n.; Plato’s sojourn in, 301, and note.

elles, how far distinguishable from ἑδρα, 372, and note.

ἐξωπλοία, the, of Socrates, Schleiermacher’s description of, 237, and note, 238

Eloics, the, connexion with the atomists, 205; mainly a metaphysical sect, 210; their school founded by Xenophanes, 219; its doctrines discussed, 219—225; connexion with the Megarics, 249, 266

Elements, the, four, according to Plato, 448; their geometrical forms, 428, 489

Eloïtes, or Eretriac School, 274; identified with the Megaric by Cicero, 275, n.

Ellis, K. L., his opinion of the educational efficacy of mathematical analysis, 109, n.

Emanations, theory of, according to Empedocles, 401, n.; according to Plotinus, 515

Emotions, their place in the Platonic scheme, 475, 476, 481
