CHAPTER I.

SQUARE AND CUBE ROOTS.

<table>
<thead>
<tr>
<th>Art.</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Extraction of square roots by the application of the formula (a^2 \pm 2ab + b^2 = (a \pm b)^2)</td>
<td>24</td>
</tr>
<tr>
<td>2. The ordinary method of finding the square root of a compound algebraical expression</td>
<td>26</td>
</tr>
<tr>
<td>3. Square roots of numbers</td>
<td>30</td>
</tr>
</tbody>
</table>
TABLE OF CONTENTS.

Art.

4. If the square root of a number consists of $2n+1$ figures, the first $n+1$ of them being found by the ordinary method, the remaining $n$ may be obtained by division only

5. The ordinary method of finding the cube root of a compound algebraical expression

6. Cube Roots of Numbers

7. If the cube root of a number consists of $2n+2$ figures, the first $n+2$ of them being found by the ordinary method, the remaining $n$ may be obtained by division only

8. Miscellaneous Examples

CHAPTER II.

INDICES.

1. Definition

2. The Index Law and the truths necessarily following from it

3. Assuming the formula $a^m \times a^n = a^{m+n}$ to be true for all values of $m$ and $n$, to find meanings for quantities with fractional or negative indices

4. To prove that $(a^n)^n = a^{mn}$ is true for all values of $m$ and $n$

5. To prove that $a^{n\cdot b} = (ab)^n$ for all values of $n$

6. Applications of the results proved in the last two articles

7. Miscellaneous Examples

CHAPTER III.

SURDS.

1. Definition

2. To express in the form of a surd the product of a rational quantity and a surd

3. A surd may sometimes be expressed as the product of a rational quantity and a surd
TABLE OF CONTENTS

Art. | Page.
-----|-----
4. Similar Surds | 63
5. Surds of the same order | 64
6. Multiplication and Division of Surds | 65
7. Compound Surds | 67
8. Rationalisation | 69
9. To find a factor which will rationalise any given binomial surd | 72
10. The square root of a rational quantity cannot be partly rational and partly a quadratic surd | 74
11. If \(a + \sqrt{b} = x + \sqrt{y}\), where \(a\) and \(x\) are rational and \(\sqrt{b}\) and \(\sqrt{y}\) are irrational, then will \(a = x\), and \(b = y\) | 75
12. To find the square root of \(a + \sqrt{b}\), where \(\sqrt{b}\) is a surd | 75
13. If \(3\sqrt{a} + \sqrt{b} = x + \sqrt{y}\), then will \(3\sqrt{a} - \sqrt{b} = x - \sqrt{y}\) | 77
14. Miscellaneous Examples | 79

CHAPTER IV.

RATIO AND PROPORTION.

1. Definitions | 85
2. Change of value of a ratio when the same number is added to both its terms | 86
3. Composition of ratios | 87
4. Approximate values of ratios | 87
5. Incommensurable quantities | 87
6. Definitions | 90
7. If \(a : b = c : d\), then will \(ad = bc\) | 91
8. If \(a : b = c : a\) then \(a : c = a^2 : b\) | 92
9. If \(a : b = c : d\), then \(b : a = d : c\) | 92
10. If \(a : b = c : d\), then \(a : c = b : d\) | 92

### CHAPTER V.

**VARIATION.**

1. Definition | 104 |
2. If A varies as B, then the numerical measure of any value of A and that of the corresponding value of B are in a constant ratio | 105 |
3. Definitions | 105 |
4. An Important Theorem | 106 |
5. Some results worth remembering | 107 |
6. Examples | 108 |

### CHAPTER VI.

**QUADRATIC EQUATIONS.**

1. Definition | 116 |
2. Solution of a pure quadratic | 117 |
3. Solution of an affected quadratic | 119 |
4. The general expression for the roots of a quadratic | 122 |
5. Sreedharacharyya's method of solving a quadratic | 124 |
6. Solution of a quadratic by the method of resolution into factors | 124 |

### CHAPTER VII.

**METHODS OF SOLUTION OF SOME IMPORTANT CLASSES OF EQUATIONS REDUCIBLE TO QUADRATICS.**

1. Equations reducible to the form \( px^2 + qx = r \) | 127 |
2. Equations in which the expression equated to zero is capable of being resolved into factors | 128 |
TABLE OF CONTENTS.

Art.  
3. Equations reducible to the form $z^2 + pz = q$ ... 131  
4. An Important Artifice ... ... ... 136  
5. Reciprocal Equations ... ... ... 137  
Miscellaneous Equations ... ... ... 140

CHAPTER VIII.  

THEORY OF QUADRATIC EQUATIONS AND QUADRATIC EXPRESSIONS.  
1. A quadratic equation cannot have more than two roots ... ... ... 143  
2. Nature of the roots of a Quadratic ... ... 144  
3. Applications of the results proved in Art. 2 ... 147  
4. Relations between the roots and the co-efficients ... 153  
5. Applications of the preceding results ... 154  
6. Distinction between a Quadratic expression and a Quadratic equation ... ... ... 161  
7. Some important theorems and examples ... 163

CHAPTER IX.  

SIMULTANEOUS EQUATIONS INVOLVING QUADRATICS.  
1. Simple cases ... ... ... 170  
2. Homogeneous Equations ... ... 176  
3. Equations symmetrical with respect to $x$ and $y$ ... 179  
4. The method of cross-multiplication ... ... 183  
5. Miscellaneous Artifices ... ... 186

CHAPTER X.  

EQUATIONAL PROBLEMS ... ... ... 205

CHAPTER XI.  

IMAGINARY QUANTITIES.  
1. Definition and Conventions ... ... ... 216  
2. Powers of $i$ ... ... ... 217
TABLE OF CONTENTS.

Art.                                      Page.
3. If $a + bi = 0$, then $a = 0$ and $b = 0$ ... 217
4. If $a + bi = c + di$, then $a = c$ and $b = d$ ... 217
5. Conjugate imaginary expressions ... ... 217
6. Definition ... ... 218
7. To find the square root of $a + bi$ ... ... 219
8. The cube roots of unity ... ... 219
9. A few miscellaneous examples ... ... 221

CHAPTER XII.

ARITHMETICAL PROGRESSION.

1. Definition ... ... ... 223
2. To find the sum of a number of terms in Arithmetical Progression ... ... 224
3. Applications of the formulae of the preceding article 226
4. Arithmetic means ... ... ... 228
5. To insert a given number of Arithmetic means between two given quantities ... ... 229
6. The natural numbers ... ... 230
7. Miscellaneous Examples ... ... 234

CHAPTER XIII.

GEOMETRICAL PROGRESSION.

1. Definition ... ... ... 240
2. To find the sum of a number of terms in Geometrical Progression ... ... 240
3. If $n$ be an integer and $r$ a given proper fraction, to prove that $r^n$ diminishes as $n$ increases ... 242
4. Geometrical series continued to infinity ... 242
5. Recurring decimals ... ... ... 244
6. Geometric means ... ... ... 245
7. Miscellaneous Examples ... ... 246

</tr>
</tbody>
</table>

## Chapter XV.

### Permutations and Combinations.

| 1. Definitions | 259 |
| 2. Simple cases of permutations explained and illustrated | 259 |
| 3. Permutations of \( n \) different things taken \( r \) at a time | 263 |
| 4. Combinations of \( n \) different things taken \( r \) at a time | 268 |
| 5. The number of combinations of \( n \) things taken \( r \) at a time is equal to the number of combinations of \( n \) things taken \( n - r \) at a time | 269 |
| 6. To find the number of combinations of \( n \) things taken \( r \) at a time without assuming the formula for the number of permutations | 278 |
| 7. To find for what value of \( r \) \( ^nC_r \) is greatest | 279 |
| 8. To find the number of permutations of \( n \) things taken all together when the things are not all different | 281 |
| 9. To find the number of permutations of \( n \) things taken \( r \) at a time when each may occur once, twice, thrice, &c., up to \( r \) times in any permutation | 288 |
| 10. To find the number of combinations of \( n \) things taken \( r \) at a time when each may occur once, twice, thrice, &c., up to \( r \) times in any combination | 290 |
| 11. Miscellaneous Examples | 292 |
CHAPTER XVI.

CHAPTER XVII.

BINOMIAL THEOREM. POSITIVE INTEGRAL EXPONENT.

1. To prove that \((1 + x)^n = 1 + \binom{n}{1}x + \binom{n}{2}x^2 + \binom{n}{3}x^3 + \ldots + \binom{n}{n}x^n\), where \(n\) is any positive integer. ... 313

2. To find an expression for the general term in the expansion of \((x + a)^n\) ... 317

3. In the expansion of \((1 + x)^n\) the co-efficients of terms equidistant from the beginning and end are equal ... 321

4. To find the greatest co-efficient in the expansion of \((1 + x)^n\) ... 321

5. To find the greatest term in the expansion of \((x + a)^n\) ... 321

6. To find the sum of the co-efficients of the terms in the expansion of \((1 + x)^n\) ... 324

7. To prove that in the expansion of \((1 + x)^n\), the sum of the co-efficients of the odd terms is equal to the sum of the co-efficients of the even terms ... 324

8. Miscellaneous Examples ... 325

CHAPTER XVIII.

BINOMIAL THEOREM. ANY EXPONENT.

1. To prove the Binomial Theorem for any exponent ... 331

2. The expansion of \((1 + x)^n\) by the Binomial Theorem is not always arithmetically intelligible ... 338

3. To find the numerically greatest term in the expansion of \((1 + x)^n\), for any rational value of \(n\) ... 339

4. A few important applications of the Binomial Theorem ... 340

5. Miscellaneous Examples ... 344
TABLE OF CONTENTS.

CHAPTER XIX.

LOGARITHMS.

Art.  Page.
1. Definition    ...    ...    ...    352
2. General Propositions    ...    ...    ...    353
3. Illustrations of the principles explained in art. 2    ...    354
4. Characteristic; Mantissa    ...    ...    ...    355
5. Advantages of the common system of Logarithms    356
6. Given the logarithms of all numbers to a certain base $a$, to find the logarithm of any number to a new base $b$    ...    ...    ...    359

CHAPTER XX.

EXPONENTIAL THEOREM AND LOGARITHMIC SERIES.

1. To expand $a^x$ in ascending powers of $x$    ...    361
2. To prove that $e$ is incommensurable    ...    362
3. Miscellaneous Examples    ...    ...    363
4. To expand $\log_e (1 + x)$ in ascending powers of $x$    368

CHAPTER XXI.

IDENTITIES, ELIMINATION AND MISCELLANEOUS ARTIFICES.

1. The method of Indeterminate multipliers for solving simultaneous simple equations involving three unknown quantities    ...    ...    373
2. If any algebraical expression $p_0 x^n + p_1 x^{n-1} + p_2 x^{n-2} + p_3 x^{n-3} + \&c. + p_{n-1} x + p_n$, where $n$ is a positive integer, be divided by $x - a$, the remainder will be $p_0 a^n + p_1 a^{n-1} + p_2 a^{n-2} + p_3 a^{n-3} + \ldots + p_{n-1} a + p_n$    ...    ...    376
3. If any algebraical expression $p_0 x^n + p_1 x^{n-1} + p_2 x^{n-2} + p_3 x^{n-3} + \ldots + p_{n-1} x + p_n$, where $n$ is a positive integer, vanish when $x$ is equal to each of the $n$ quantities $a_1$, $a_2$, $a_3$, $a_4$, $\ldots a_n$, then will $p_0 x^n + p_1 x^{n-1} + p_2 x^{n-2} + \ldots + p_{n-1} x + p_n = p_0 (x - a_1)(x - a_2)(x - a_3)\ldots\ldots (x - a_n)$    377
