TRÜBNER'S
COLLECTION OF SIMPLIFIED GRAMMARS
OF THE
PRINCIPAL ASIATIC AND EUROPEAN LANGUAGES.
EDITED BY REINHOLD ROST, LL.D., PH.D.

The object of this Series is to provide the learner with a concise but practical Introduction to the various Languages, and at the same time to furnish Students of Comparative Philology with a clear and comprehensive view of their structure. The attempt to adapt the somewhat cumbrous grammatical system of the Greek and Latin to every other tongue has introduced a great deal of unnecessary difficulty into the study of Languages. Instead of analysing existing locations and endeavouring to discover the principles which regulate them, writers of grammars have for the most part constructed a framework of rules on the old lines, and tried to make the language of which they were treating fit into it. Where this proves impossible, the difficulty is met by lists of exceptions and irregular forms, thus burdening the pupil's mind with a mass of details of which he can make no practical use.

In these Grammars the subject is viewed from a different standpoint; the structure of each language is carefully examined, and the principles which underlie it are carefully explained; while apparent discrepancies and so-called irregularities are shown to be only natural euphonic and other changes. All technical terms are excluded unless their meaning and application is self-evident; no arbitrary rules are admitted; the old classification into declensions, conjugations, &c., and even the usual paradigms and tables, are omitted. Thus reduced to the simplest principles, the Accidence and Syntax can be thoroughly comprehended by the student on one perusal, and a few hours' diligent study will enable him to analyse any sentence in the language.
