The International Library
OF
PSYCHOLOGY, PHILOSOPHY
AND SCIENTIFIC METHOD

Edited by
C. K. OGDEN, M.A.
Late Fellow of Magdalene College, Cambridge

The International Library, of which over one hundred and fifty volumes have been published, is both in quality and quantity a unique achievement in this department of publishing. Its purpose is to give expression, in a convenient form, to the remarkable developments which have recently occurred in Psychology and its allied sciences. The older philosophers were preoccupied by metaphysical interests which for the most part have ceased to attract the younger investigators, and their forbidding terminology too often acted as a deterrent for the general reader. The attempt to deal in clear language with current tendencies whether in England and America or on the Continent has met with a very encouraging reception, and not only have accepted authorities been invited to explain the newer theories, but it has been found possible to include a number of original contributions of high merit.
